Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-7 are objected to because of the following informalities: The claims have missing letters. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Coppola.

Coppola discloses the use of a drum assembly and a drum rim guard comprising a hollow drum shell, a rim and drum head closing each end of the drum shell (see figure 2), a drum rim guard(10) secured to at a selected position on one of the drum rims protecting the rim of the drum against damage and providing a desired modification of the sound produced by the rum when struck by the drummer, and said drum rim guard comprising a sleeve member having only a fraction pf the circumference of the drum rim, hooking over both edges of the drum rim and secured directly thereto by means engaging only the drum rim (see figure 1).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 4, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cappola in view of Valen.

Cappola does not disclose the use of a drum rim guard comprising a sleeve member fitting over only one edge of the drum rim using screws to secure the sleeve member and drum ring directly together.

Valen discloses the use of a drum rim guard comprising a sleeve member fitting over only one edge of the drum rim using screws to secure the sleeve member and drum ring directly together (see figure 1).

It would have been obvious to one ordinary skill in the art at the time the invention was made to modify the device as disclosed by Cappola with the screws as disclosed by Valen in order to minimize rim wear and breakage.

6. Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cappola in view of Valen and Hoshino('229).

Cappola and Valen do not disclose the use of nuts and bolts.

Hoshino discloses the use of a drum rim that uses nuts and bolts for securing purposes (see figure 1).

It would have been obvious to one ordinary skill in the art at the time the invention was made to modify the device as disclosed by Cappola with the screws as disclosed by Valen and the nuts and bolts as disclosed by Hoshino in order to maintain the position of the drum rim and it's attachments.
